

AE-P0002

# POWER SUPPLY UNIT ST909T

## Features:

- The Obbo Power Supply is a reliable and compact unit.
- It is designed to provide stepped-voltage requirements of 2V to 12V a.c and d.c at max current of 8A.
- Voltage selection is by rotary switch in the front panel.
- Color coded 4mm spin free socket terminals are provided for a.c and d.c outputs
- The LED lamp (OVL D) lights up in the event of an outputs overload.
- Turn off the main switch for 20 secs and then switch on to reset.

## SPECIFICATIONS:

Main Input	220V to 240V a.c. 50Hz
Fuse	1A, antisurge
On/Off	Rocker switch, neon
Output	2V to 12V a.c. at 8A 2V to 12d.c. Full wave rectified and unsmoothed at 8A
Circuit Protection	An electronic cut out gadget is incorporated. It disconnect the main primary in case of an output overload or short-circuit
Safety Protection	Case is earthed via 3-core main lead
