

# ATOMIC MODEL

MO-A0003

## Syllabus :

Kimia Tingkatan 4 KBSM  
Bab 2 – Struktur Atom

For the demonstration of the independent agitation of atoms or groups of atoms in a solid crystal while still retaining their basic structural relationships. The connection between greater amplitude of vibration and increased temperature may also be suggested.

- Spherical shape
- 25mm diameter
- Can be connected with a spring in 4-axis
- The distance between the center of the sphere of 70mm
- 100 spheres and 50 connectors
