DYNAMIC TROLLEY, IEC

The precision-made IEC Dynamics Trolley are rigid and strong and can take the weight of an adult without bending or breaking. Each trolley is complete with a firing button and a 2 position spring loaded firing shaft with a safety locking device to prevent accidental firing. These carts run true and straight and the wheels are of low mass and low friction. Each is accurately calibrated to be 600gms in weight and they may be stacked on one another. They can be loaded with house bricks or similar weights for velocity, acceleration and collision experiments.
