

AA-D0051

DYNAMIC TROLLEYS

An affordable and effective teaching aid for demonstration in potential / Kinetic Theories. With features that allow additional weights to be loaded, experiments in velocity, acceleration and collision can be conducted with ease. A teaching apparatus to explore Newton's Laws

FEATURES :

- Robust design and durable
- With firing button to activate 2 levels of spring tension
- Safety lock to prevent accidental firing
- Low mass and low friction wheels
- Stackable
