

AA-L0073

# LIGHT BOX & OPTICAL SET, HODSON (IEC, AUSTRALIA)

- An excellent light source and kit of lenses, prisms, mirrors and filters used for teaching the fundamentals of optics.
- All the acrylic lenses and prisms have a small handle to avoid touching or smearing the optical surfaces.
- Experiments include colour blending, shadows, reflection, refraction, images, front and rear silvered mirrors, secondary reflections, critical angles, internal reflection, parabolic reflectors, focal length of lenses and mirrors and the study of the visible spectrum.
- Using 12V 30W, type G6, 2 pin halogen lamp with axial filament.
- All packed in a strong and attractive foam housing.
