

AE-P0004

POWER SUPPLY UNIT E.H.T

SPECIFICATIONS:

- Power Supply EHT. 0-6000V x 3mA.
- Two isolated output AC low voltage 6.3V x 4A with Meters.
- Designed for Education where high voltage required.
- The Extra High Voltage Power Supply (2x 6.3V.AC @ 4amps, 3,000 / 0 / 3,000V.DC) is an important and special power supply for running Spectrum tubes or Teltron tubes or many other functions.
- The low voltage is provided as 2x 6.3V.AC. 4A outputs which are normally used for running heaters of electron tubes.
