

**AA-T0037**

# **TRICOLOR SYSTHESIS EXPERIMENTAL INSTRUMENT**

## **FEATURES:**

- A very simple ways of demonstrating the concept of primary color mixing
- Adjustable light intensity to obtain different result

## **SPECIFICATIONS:**

- Made of durable plastic casing
- Operating voltage of 4.5 – 6.0 V
- Dual power source: 3 AAA batteries or DC power supply
- Overall dimensions approximately 80 x 110 x 105 mm
